CreateASkate.org Parent Petition

Students make their own skateboard, but learn so much more! Middle and high-school aged students can create their own personal skateboard deck using an education based curriculum provided through the CreateAskate.org program. The nonprofit (501c3) CreateAskate.org programs were developed as a 5 hour Art class (no power tools need) or a 10 hour woodshop class (band-saw and belt sander are only power tools needed). The entire curriculum is easily adapted to a teacher's individual schedule and ability (teachers do not need to be accomplished skateboarders, artists or woodworkers themselves!).

We, the undersigned Parents, would like to see our kids afforded the opportunity to participate in the CreateAskate.org programs. In order to bring this program to _____ (Child's school), we are willing to help guide our children in their quest to raise the $15 per student needed for the curriculum & supplies. We believe the students will stand behind this program and commit themselves to an exciting way of using applied Math, Science, and Artistry in a forum that excites and engages them.

School Name		School Address		
☐ Art Program	☐ Woodshop Program	Grade	Teacher	Period

Parent Name Printed	Parent Signature	Student Name	Date	Comments

Upon completion of signatures please make 3 copies of this document, present one to the school PTA, one to the student's teacher and one to the school principal.
